DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-3 and 10, drawn to a virus suppressing factor protein and a pharmaceutical composition comprising said protein.

Group II, claim(s) 4, drawn to a method of producing a hybridoma comprising fusing an immune cell stimulated by a variant of encephalomyocarditis virus with a tumor cell and producing the hybridoma secreting a virus suppressing factor protein.

Group III, claim(s) 5 and 7, drawn to a method of preparing a virus suppressing factor with the producing of a hybridoma, culturing the hybridoma, and isolating the protein from the culture fluid.

Group IV, claim(s) 6 and 12, drawn to a method preparing a virus suppressing factor protein comprising producing a hybridoma, injecting the hybridoma into an animal, and isolating the protein from the ascitic fluid obtained from the animal.

Group V, claim(s) 8-9, drawn to a hybridoma.

Group VI, claim(s) 11, drawn to a method of treating or preventing viral infections with the administration of the virus suppressing factor protein.

2. The inventions listed as Groups I-Vi do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The technical feature shared among the groups is the virus suppressing factor protein produced by hybridoma comprising fusing an immune cell stimulated by a variant of encephalomyocarditis virus with a tumor cell. The noted shared technical feature does not provide a contribution over the prior art, as evidenced by Vlaspolder et al.

Vlaspolder et al. teaches a virus suppressing factor protein produced by hybridoma comprising fusing an immune cell stimulated by a variant of encephalomyocarditis virus with a tumor cell. Hence, in the absence of a contribution over the prior art, the shared technical feature is not a shared special technical feature. Thus, in the absence of a shared special technical feature, the inventions lack unity with one another.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of

Art Unit: 1648

record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Emily Le whose telephone number is (571) 272 0903. The examiner can normally be reached on Monday - Friday, 8 am - 5:30 pm.
